

TTL 6-A

ACTIVE THREE-WAY LINE ARRAY MODULE

DESCRIPTION

The TTL6-A is a high power, three way, active line source engineered to deliver high fidelity output for use indoors and outdoors, for medium to large spaces. TTL6-A provides all the advantages of line array technology, such as high direct sound, increased range and a uniform level distribution, with additional ease of use. It is the preferred sound set-up for stacked systems and when a wider dispersion is required. The 3-way TTL6-A line source is equipped with 2 x 12" low frequencies woofers, 4 x 6.5" midranges and a 3.0" voice coil compression driver with wave-guide for distinctive homogenous directivity. The integration of four channels of digital amplification and the advanced digital processing set a new standard for distortion, noise and thermal efficiency.
